

CIS 3760 – Software Engineering
Instructor: Prof. S. Scott
Individual Accountability Report (IAR) – Sprint 3

Q1. Student Name: Alexander Blankenstein

Q2. Student ID: 1094640

Q3. Associated Team Deliverable: Sprint 3

Q4. Section# 2 (0102), Team # 5

Q5. What were the main technical or methodological concepts and/or skills that were required to complete this team deliverable? (bulleted list is preferred):

- Knowledge of Java (activities and Calendar view components)
- Gitlab
- Communication
- Time management
- Junit testing

Q6. What was your existing level of experience with these topics/skills before your team began working on this deliverable? (1-2 sentences):

This week I continued with Java development and working with my team in an agile based activity. Because nothing with that was new to me by now, I feel like I had all the skills needed and just further honed in on my experience with it.

Q7. Comment on your individual academic, methodological, or technical learning during this deliverable, and what additional learning may be needed to understand or be more competent with these topics in the future?

No new skills or knowledge was gained during this sprint. Again this time around I focused on what I learned previously and worked to perfect those new skills by practicing.

Q8. What specific contributions did you make to this team deliverable? This should include technical or project management contributions.

I made the calendar View into a functional date picker and made it so the list view filtered out To-Do items based on date. This then lead me to work on my second task which was then clearing the picked date and having all element displayed once more. I also worked on reformatting some original code so that bugs don't occur and fixed up some minor UI things like the app heading.

Q9. With whom did you collaborate for any of the above contributions (be specific)?

I provided assistance to the team when ever they asked questions, but for the most part my tasks were separate from theirs.

Q10. Comment on how well you managed your time over the time period allocated in the Course timetable to this team deliverable (i.e. the time between the prior team deliverable to this team deliverable).

I feel like I had managed my time well when considering work and the other major assignments, I had due during the sprints time frame. School is definitely ramping up as we get closer to the end and I am easily starting to feel the stress.
